

REMARKS

This communication is responsive to the Notice to Comply, dated May 4, 2009. The Office objected to claim 9 for its lack of a unique sequence identifier. Applicants have revised claim 9 and the specification to provide a sequence identifier for the amino acid sequence HDEL (SEQ ID NO: 121). Claim 9 also is amended to correct the sequence from the erroneous "HEDL" to "HDEL." This amendment is supported by the specification at page 15, lines 16-18 and page 88, line 1. Claims 97 is amended as well to correct a minor typographical error.

In the Amendment and Reply of November 6, 2008, a mannose (Man) sugar was erroneously missing from the formula recited in claims 2, 94, and 108. The missing mannose has been restored, but it is not marked as an amendment because the mannose was never marked for deletion.

These amendments do not introduce new matter. Accordingly, applicants respectfully believe that they have complied with the Notice. The examiner is invited to contact the undersigned directly, should she feel that any issue warrants particular consideration.

The Commissioner is hereby authorized to credit any overpayment and to charge any additional fee, which may be required under 37 C.F.R. §§ 1.16-1.17, to Deposit Account No. 19-0741. Should no proper payment accompany this response, then Commissioner is authorized to charge the unpaid amount to the same account. If any extension is needed for timely acceptance of submitted papers, then applicants hereby petition for such extension under 37 C.F.R. § 1.136 and authorize payment of the relevant fee(s) from the account.

Respectfully submitted,
